

IDEA

The future is designed by people. Also in the Limmattal. Regionale 2025 supports the ideas of these people and shows their innovative projects.

People are designing new meeting places. They are contemplating new living spaces. They are reorganizing public transportation: many people in the Limmattal are working with new ideas for their valley.

Regionale 2025 is offering a platform for these ideas. Regionale sees itself as a big exhibition reminiscent of a Triennale – a Triennale for the region. Regionale 2025 will take place in 2025 by focusing on one of the most important Swiss regions. Two intermediate exhibitions in 2019 and 2022 will showcase the progress of these projects.

The projects are innovative. They answer inherent questions of specific Limmattal challenges. They favor solutions that will persevere or even expand the livelihood and diversity of the Limmattal. The community

at large will be able to view and experience the showcased projects of Regionale 2025.

Regionale 2025 is backed by Verein Regionale Projektschau Limmattal. Founded in 2015, the Verein is supported by 15 Limmattal municipalities and cities as well as Kanton Aargau and Kanton Zürich. The goal of the association is to enhance the image of the Limmattal and to coordinate the different projects.

Regionale 2025 serves as driving factor for sustainable development of the Limmattal. Their activities contribute to a highly visible identity for the region. Whatever happens in the Limmattal over the coming years will lead the path for Switzerland as a whole.
